

Welcome to Ivor Smith Electrical

We are commercial and industrial electricians, we are very active in the automation industry, catalytic converters, factories, warehousing, buildings and the tyre industry. We set high standards, which we deliver as part of our service. Our highly trained and competent electrical staff have a commitment to both the company and to clients. Our suppliers have also contributed to our success, by supplying quality materials and efficient service. We allow our clients to get on with their core business and we get on with our side of the contract. We meet our deadlines whatever it takes.
